Aaryan S. Maralihalli

Key Account Manager — Strategic Accounts (India)

Bangalore, India · aaryanmaralihalli@gmail.com · +91-9019884683 · github.com/Aaryansm11 · linkedin.com/in/aaryan-maralihalli · portfolio

Summary

Client-facing account owner who **grows enterprise accounts by tying platform capability to business outcomes**. At HyperVerge (enterprise AI/SaaS platform), owned **6 enterprise fintech accounts** — took **3 live at >95% conversion (~10% lift)** and drove expansion by **proactively adding modules clients hadn't scoped but needed**. Sells into the **same India consumer-app buyer profile as Plotline** (PaytmMoney, IndMoney, Mobikwik). Technically fluent — credible advisor on a platform with real implementation depth. CS graduate, Jul 2026; IEEE-published.

Experience

HyperVerge, Bangalore

Integration Engineer Intern (client-facing account ownership) Jan 2026 – Jun 2026

Enterprise AI identity-verification / KYC SaaS platform for banks & consumer fintech apps

- **Owned 6 enterprise fintech/lending accounts** (HomeCredit, PaytmMoney, Mobikwik, Shivalik Bank, IndMoney, Emergency Paisa) spanning **15+ lines of business** — from discovery through go-live, adoption, and post-launch stabilization.
- **Drove account expansion / white-space:** identified unaddressed needs and **proactively added modules clients hadn't scoped**, deepening platform adoption across each account's product lines — directly increasing account value.
- **Delivered measurable business value:** took **3 accounts live at >95% verification conversion — a ~10% lift** — by mapping each client's pain points and conversion/drop-off metrics to the right platform capabilities; ran post-go-live business reviews and optimization.
- **Multi-stakeholder orchestration:** served as primary contact across client Product, Engineering, and business teams; coordinated cross-functional delivery on JIRA and **managed deal stages and milestones in HubSpot**.
- Built **"HV Deals Bot"** (Python + Slack) to track every account's stage and next steps across the team — improving pipeline visibility and handoff; **3 more accounts in active integration** at handover.

Integrated Genetic Solutions (IGS), Bangalore

Project Intern Jun 2024 – Aug 2024

- Led migration of a legacy dashboard to **React (MERN)** on a HIPAA-compliant medical-AI product, improving processing of **5M+ lab values**; supported secure-upload and API integration.

Why Plotline (account & domain fit)

- **Same buyer, same problem:** my HyperVerge accounts are India consumer-fintech apps (PaytmMoney, IndMoney, Mobikwik) — the exact Dream11/Zepto/Upstox profile Plotline sells to; my core lever was **conversion and drop-off optimization**, which *is* the value app-personalization delivers.
- **Indian enterprise fluency:** Bangalore-based, navigated multi-stakeholder fintech orgs and their compliance-driven decision-making end to end.
- **Trusted technical advisor:** can speak to the platform credibly, turning vendor conversations into strategic, roadmap-level partnerships.

Selected Projects *(technical depth behind client conversations)*

SDIS — Secure Document Intelligence Service github.com/Aaryansm11/SDIS

- FastAPI platform with RBAC/JWT, PII redaction, and audit logging — hands-on grasp of how enterprise AI platforms are built and integrated.

Self-Supervised Cardiac Model (IEEE-published) github.com/Aaryansm11/ecg-ppg-arrhythmia-prediction

- Contrastive learning (SimCLR) on MIMIC-III ECG/PPG; **ROC-AUC 0.757** — rigor and the ability to articulate complex technical value to non-technical stakeholders.

Skills

- **Account Growth & Sales:** strategic account ownership, expansion / cross-sell (white-space), consultative selling, business-value & ROI articulation, business reviews (QBR-style), stakeholder & escalation management, CRM pipeline management (HubSpot)
- **Domain:** enterprise fintech & India consumer apps, KYC/identity, conversion & drop-off analytics, SaaS / AI-platform adoption & integration
- **Technical fluency:** REST APIs, SDK integration, solution design, Python, SQL | **Tools:** HubSpot, JIRA, Notion, Slack, Git

Publication & Education

- **IEEE ICASI 2026 (Kyoto), Oral Presentation** — *"An Interpretable Model for Stroke Prediction and Arrhythmia Classification using ECG & PPG."*
- **B.Tech, Computer Science** — PES University, Bangalore — 2022 – Jul 2026
- *Certifications:* WebGL (PESU I/O); Problem Solving — Intermediate (HackerRank); CITI Program
