Aaryan S. Maralihalli

Associate Account Manager — Enterprise SaaS (Customer Success & Growth)

Bangalore, India · aaryanmaralihalli@gmail.com · +91-9019884683 · github.com/Aaryansm11 · linkedin.com/in/aaryan-maralihalli · portfolio

Summary

Client-facing engineer moving into account management, with real **enterprise-account ownership** at an AI SaaS. At HyperVerge I owned **6 enterprise accounts** end-to-end as the post-sale trusted advisor, **drove adoption and expansion** (proactively adding modules clients hadn't scoped), and delivered measurable impact — **3 accounts live at >95% verification conversion (~10% lift)**. I turn technical wins into retained, growing accounts, and my engineering depth lets me speak credibly to everyone from a client's integration team to its senior leaders. CS graduate, 2026.

Experience

HyperVerge, Bangalore

Integration Engineer, Solutions Team (Intern) Jan 2026 – Jun 2026

Enterprise AI identity-verification / KYC SaaS for banks & fintechs

- **Owned 6 enterprise accounts** (HomeCredit, PaytmMoney, Mobikwik, Shivalik Bank, IndMoney, Emergency Paisa) as the single post-sale point of contact — from kickoff and onboarding through integration, go-live, and ongoing growth.
- **Drove expansion and adoption:** mapped each account's goals to the right modules and proactively added ones clients hadn't scoped (Name Match, eSign, Video KYC, Liveness/Face Match, DigiLocker), deepening usage across **15+ lines of business** per account.
- **Delivered measurable business impact:** took **3 accounts live at >95% verification conversion (~10% lift)** over their prior flow; ran post-go-live **business reviews and stabilization** with daily conversion / drop-off monitoring and follow-up optimizations.
- **Onboarding & enablement:** authored Solution Design Docs, ran client integration calls and walkthroughs, issued production credentials, and guided client technical teams toward self-sufficiency.
- **Relationship & pipeline management:** tracked deal milestones in **HubSpot** and built a Python + Slack "Deals Bot" that gave the team live deal-stage visibility; **3 more accounts in active integration** at handover.
- **Cross-functional orchestration & escalations:** partnered with Product & Engineering via JIRA to close account feature gaps and resolve issues — shipped a production workaround for an eSign product gap to keep an account's go-live on track.

Integrated Genetic Solutions (IGS), Bangalore

Project Intern Jun – Aug 2024

- Delivered a client-facing product improvement — migrated a legacy dashboard to **React/MERN** on a HIPAA-compliant platform processing **5M+ records**.
- Supported secure report uploads and API telemetry on **SafeScribe**, working directly against the client product's needs.

Skills

- **Account Management / CS:** enterprise account ownership, adoption & expansion, business reviews (QBR-style), stakeholder management, retention & conversion, consultative solutioning, escalation handling
- **Revenue / Tools:** HubSpot (CRM), pipeline & deal tracking, BI / conversion analytics, Notion, JIRA, Slack
- **Technical (differentiator):** REST APIs & integrations, KYC / identity domain, AI / SaaS platforms (RAG, LLM apps), Python, SQL
- **Domain:** fintech & lending onboarding, identity verification, compliance-aware delivery

Selected Projects (technical depth)

SDIS — secure enterprise AI platform github.com/Aaryansm11/SDIS

- Retrieval-augmented (RAG) document service with RBAC, immutable audit logging, and REST APIs on FastAPI/PostgreSQL — fluency in the enterprise security, implementation, and AI topics customers ask about.

our-life-hq — shipped 3D web app github.com/Aaryansm11/our-life-hq

- React Three Fiber + Supabase, deployed on Cloudflare; built and launched end-to-end for real users (product and engagement sense).

AlgoScope — shipped developer tool

- In-browser DSA visualizer (React / Next.js + Pyodide), live at algoscope-beta.vercel.app — turns a complex idea into an intuitive user experience.

Publication & Education

- **IEEE ICASI 2026 (Kyoto), Oral Presentation** — interpretable ML for stroke prediction & arrhythmia classification (ECG/PPG).
- **B.Tech, Computer Science** — PES University, Bangalore — 2022 – Jul 2026
- **Certifications:** Problem Solving — Intermediate (HackerRank); Graphics Programming with WebGL (PESU I/O); CITI Program (research ethics).
