Aaryan S. Maralihalli

AI Engineer — APIs & Agentic Tooling

Bangalore, India · aaryanmaralihalli@gmail.com · +91-9019884683 · github.com/Aaryansm11 · linkedin.com/in/aaryan-maralihalli · portfolio

Summary

API-first AI engineer: spent six months **living inside enterprise API integrations** (KYC platform → 6 fintech clients, 15+ lines of business), and builds LLM systems with the same testing discipline — **FastAPI services with pytest + CI**, RAG retrieval, **LoRA fine-tuning**, agent-style dual-model architectures. **IEEE-published.** Believes APIs are how AI becomes useful — which is why Postman's agentic direction fits. CS grad, Jul 2026.

Experience

HyperVerge, Bangalore
Integration Engineer Intern Jan 2026 – Jun 2026
AI identity-verification / KYC platform — client-facing API integrations

- Owned **end-to-end API integration** for **6 enterprise fintech clients** across **15+ lines of business** — REST APIs for Video KYC, face match, liveness, eSign, DigiLocker, OCR; tested and debugged flows with **Postman collections** across staging and production.
- Took **3 clients live at >95% verification conversion — a 10% lift**; issued production credentials, configured **API rate limits** and staging app IDs, and drove post-go-live monitoring and stabilization.
- Authored **Solution Design Docs** (developer-facing integration documentation) and ran client integration calls and go-lives; raised/resolved JIRA tickets with Product/Engineering and shipped a production workaround for an eSign API gap.
- Built **"HV Deals Bot"** (Python + Slack API) for team-wide deal-stage tracking.

Integrated Genetic Solutions, Bangalore
Project Intern, Medical AI & Web Jun 2024 – Aug 2024

- Led legacy-JS → **React (MERN)** migration on a HIPAA-compliant product processing **5M+ lab values**; assisted React + Django API integration for secure uploads and telemetry.

Selected Projects

SDIS — secure RAG microservice github.com/Aaryansm11/SDIS

- **FastAPI** REST service — JWT/RBAC auth, rate limiting, CORS, PII redaction (spaCy), FAISS retrieval over PostgreSQL, immutable audit logging; Dockerized on AWS ECS; **pytest + GitHub Actions CI** — API design and test rigor as the core of an AI product.

LANGTRON — agent-style AI assistant github.com/Aaryansm11/LANGTRON

- Fine-tuned **Mistral-7B (LoRA)**; **dual-model architecture** (memory + problem-solving) with **FAISS retrieval at sub-100ms**; fully local.

AlgoScope (live devtool)

- Paste a Python solution and **watch the data flow** — in-browser Pyodide tracing with animated structures; React/Next.js, deployed (algoscope-beta.vercel.app) — builds tools that make code legible to developers.

Langtron-KGS github.com/Aaryansm11/Langtron-KGS

- Document → knowledge-graph **FastAPI microservice** (spaCy NER + BERT relation extraction → Neo4j).

Self-Supervised Cardiac Model (IEEE-published) github.com/Aaryansm11/ecg-ppg-arrhythmia-prediction

- Contrastive learning on MIMIC-III; **ROC-AUC 0.757**; FastAPI inference server.

Skills

- **APIs / Backend:** REST API design (FastAPI, Flask, Django), Postman, JWT/RBAC, rate limiting, webhooks-style event flows, pytest, GitHub Actions CI, Docker, AWS, PostgreSQL, Redis, Kafka
- **AI / LLM:** RAG, FAISS, LoRA fine-tuning, HuggingFace, PyTorch, LangChain, spaCy, prompt/response evaluation
- **Languages & Tools:** Python, TypeScript (React/Next.js), SQL, Java; technical writing (solution design docs); DSA (150+ LeetCode)

Publication & Education

- **IEEE ICASI 2026 (Kyoto), Oral Presentation** — *"An Interpretable Model for Stroke Prediction and Arrhythmia Classification using ECG & PPG."*
- **B.Tech, Computer Science** — PES University, Bangalore — 2022 – Jul 2026
