Aaryan S. Maralihalli

Integration / Solutions Engineer

Bangalore, India · open to remote · aaryanmaralihalli@gmail.com · +91-9019884683 · github.com/Aaryansm11 · linkedin.com/in/aaryan-maralihalli

Summary

Solutions Engineer who takes enterprise fintech **KYC** clients from discovery to live — and proves impact. At HyperVerge, took **3 clients live at >95% verification conversion (~10% lift)** across **15+ lines-of-business**, and built internal tooling to speed the team's delivery. Translates client pain points into shipped solutions; comfortable in Python/SQL and across APIs. CS graduate (2026), **IEEE-published**.

Experience

HyperVerge, Bangalore
Integration Engineer Intern Jan 2026 – Jun 2026
AI identity-verification / KYC platform for banks & fintechs

- Owned end-to-end solutioning and integration for **6 enterprise fintech/lending clients**, spanning **15+ lines-of-business/workflows** and KYC modules including **CKYC, Video KYC/VPD, eSign, Name Match, Liveness, Face Match, DigiLocker, and OCR/NSDL-PAN** (HomeCredit, PaytmMoney, Mobikwik, Shivalik Bank, IndMoney, Emergency Paisa).
- Took **3 clients live at >95% verification conversion — a ~10% lift** over their prior onboarding flow, by matching pain points to the right modules (Name Match, eSign, Video KYC, Liveness/Face Match, DigiLocker) and **proactively adding modules clients hadn't scoped but needed**.
- Authored Solution Design Docs, ran **client sanity-check calls and integration walkthroughs**, prepared **production go-live checklists and RCAs**, and issued production credentials; drove **post-go-live BI & stabilization** through daily conversion/drop-off monitoring.
- Partnered with Product & Engineering via JIRA to close feature gaps — shipped an **eSign-Start workaround to production**.
- Built **"HV Deals Bot"** (Python + Slack) to track every deal's stage and next steps so nothing slips and the delivery process is documented for new joiners; **3 more clients in active integration** at handover.

Integrated Genetic Solutions (IGS), Bangalore
Project Intern, Medical AI & Web Dev Jun – Aug 2024

- Migrated a legacy **Bootstrap-JS dashboard to React (MERN)**, improving processing of **5M+ blood-lab values** on SafeScribe, a HIPAA-compliant medical-AI product; supported React + Django integration for secure uploads and API telemetry.

Selected Projects

SDIS — Secure Document Intelligence Service github.com/Aaryansm11/SDIS

- Production-style **FastAPI** microservice with **JWT auth, RBAC, PII redaction, immutable audit logging**, and embedding search (FAISS) over **PostgreSQL**; Dockerized on AWS ECS. *(API design + security + integration.)*

Langtron-KGS — Knowledge-Graph Service github.com/Aaryansm11/Langtron-KGS

- Turns documents into a **Neo4j knowledge graph** (spaCy NER + BERT relation extraction) behind a **FastAPI REST API** with a Streamlit explorer.

Live Emostream — real-time pipeline github.com/Aaryansm11/Live_emostream

- Event-driven **Kafka + Spark + Redis** broadcast with **nginx load balancing**, load-tested to **1,000 concurrent users** (Locust).

Skills

- **Integration & APIs:** REST, JWT, webhooks, SDK integration, rate limiting, Postman
- **Solutions:** technical discovery, demos & POCs, solution design, translating technical↔business value, KYC/identity domain, BI & stabilization
- **Engineering:** Python, FastAPI, Flask, JavaScript/React, SQL (PostgreSQL/MySQL), AWS (EC2/S3/IAM/ECS), Docker
- **Tools:** JIRA, HubSpot, Notion, Git

Publication & Education

- **IEEE ICASI 2026 (Kyoto), Oral Presentation** — *"An Interpretable Model for Stroke Prediction and Arrhythmia Classification using ECG & PPG."*
- **B.Tech, Computer Science** — PES University, Bangalore — 2022 – Jul 2026
- *Certifications:* Graphics Programming with WebGL (PESU I/O); Problem Solving — Intermediate (HackerRank); CITI Program
