HyperVerge, Bangalore
Integration Engineer Intern Jan 2026 – Jun 2026
AI identity-verification / KYC platform for banks & fintechs

- Ran end-to-end integrations across **15+ lines-of-business/workflows** for 6 enterprise fintech/lending clients (Home-Credit, PaytmMoney, Mobikwik, Shivalik Bank, IndMoney, Emergency Paisa): **client sanity-check calls**, integration walkthroughs, REST/SDK wiring, **production go-live checklists & RCAs**, and production credential issuance.
- Took **3 clients live at >95% verification conversion**; debugged integration deviations and configured **API rate limits and staging app IDs** for safe rollout.
- Integrated modules across **Name Match, eSign, Video KYC, Liveness/Face Match, and DigiLocker**; shipped an **eSign-Start workaround to production** by coordinating with Product/Engineering on JIRA.
- Built **"HV Deals Bot"** (Python + Slack) to track every integration's stage and next steps, reducing missed handoff steps across the team.
